Integration Setup: Google/Gmail

Getting Started · https://coreel.ai/help/integration-setup-google-gmail/

Connect Google to enable sending/tracking via your authorized account.

Before You Start

- You must be logged into coReel
- Use the Google account you want to send from
- Popups should be allowed in browser

Connect Google

1. Go to **Integrations** (/integration).
2. Under **Available Integrations**, click **Google**.
3. Select the correct Google account.
4. Review and approve requested permissions.
5. Return to coReel.

Confirm Connection

In **Connected Integrations**, Google should appear as connected, often with account label info.

If Connection Fails

- Retry connect flow from /integration
- Ensure you completed consent flow fully
- Confirm browser didn’t block popup/redirect
- Log out/in and re-check status

Disconnect/Reconnect Google

1. In **Connected Integrations**, click **Disconnect** on Google.
2. Reconnect using steps above.
3. Re-test sending/tracking.

Best Practice

Use a dedicated business mailbox for outreach consistency and tracking clarity.
