Record longer videos (up to 10 minutes on Premium)

Recording Videos · https://coreel.ai/help/record-longer-videos-up-to-10-minutes-on-premium/

Premium members — and anyone on a free trial, which includes the full Premium experience — can now record or upload videos up to **10 minutes**, double the previous 5-minute limit. More room for demos, walkthroughs, training, and detailed proposals.

Step 1 — Check your plan

1. The 10-minute limit applies to **Premium** plans and **active trials**.
2. **Essentials** and **Business** plans record up to 5 minutes.

Success check: On Premium or a trial, the recorder lets you keep going past 5 minutes, up to 10.

Step 2 — Record or upload as usual

1. Start a new video and record — the timer now allows up to 10 minutes.
2. Or upload an existing video file up to the same 10-minute length.

Success check: Your full-length video records or uploads without being cut off at 5 minutes.

Tips and best practices

- Longer isn't always better — keep cold outreach short, and save the 10-minute length for demos, onboarding, and training where the extra time earns its keep.
- Longer videos take a little longer to process after recording; the watch page is ready as soon as processing finishes.

Troubleshooting

My recording still stops at 5 minutes.

You're likely on an Essentials or Business plan. Upgrade to Premium (or start a trial) for the 10-minute limit.

I'm on Premium but the mobile app caps me at 5 minutes.

The 10-minute limit on the mobile app arrives with app version 1.2.0 — update from the App Store or Google Play.
