# Supported Browsers and System Requirements

General · https://coreel.ai/help/supported-browsers-and-system-requirements/

Use supported environments for best recording and integration reliability.

## Recommended Browser

- **Google Chrome (latest stable)**

## Minimum Recommendations

- Reliable broadband internet
- Working camera and microphone
- Updated OS/browser security patches
- Ability to allow camera/mic permissions in browser

## For Chrome Extension Users

- Chrome extension installed and pinned
- Camera/mic permissions granted
- Popups/redirects allowed during integration auth flows

## Performance Tips

- Close unnecessary tabs/apps while recording
- Use wired/strong Wi-Fi network
- Prefer external microphone for cleaner audio

## Known Constraints

- Some corporate environments block OAuth popups/redirects
- Security software may block camera/mic access without explicit allow rules
