Video Recording Basics (Camera, Mic, Screen Options)

Getting Started · https://coreel.ai/help/video-recording-basics-camera-mic-screen-options/

Use this guide to record clean, professional videos quickly.

Before You Record

- Confirm camera and microphone permissions are allowed in Chrome
- Close apps that might be using your camera/mic
- Choose a quiet room with front lighting

Choose Your Inputs

1. Open the recorder in coReel or extension.
2. Select your **camera** device.
3. Select your **microphone** device.
4. If available, choose recording mode:
   - Camera only
   - Screen + camera
   - Screen only

Start and Stop Recording

1. Click **Start Recording**.
2. Deliver your message (30–60 seconds recommended).
3. Click **Stop**.
4. Save/upload the recording.

Quality Checklist

- Eye contact with camera
- Clear audio (no clipping/background noise)
- Stable framing and lighting
- One clear CTA at the end

If Recording Fails

- Re-run permission flow
- Switch camera/mic devices
- Refresh page and retry
- Check troubleshooting article for recording/upload issues
